

# Nutritional Supplements **FEED GUIDE**

THE COMPLETE RANGE FROM

**EQUINE**   
**PRODUCTS UK LTD**  
PIONEERING NEW FRONTIERS IN NUTRITION

## 2 Foreword

Renowned throughout the world Equine Products UK Ltd, one of the United Kingdoms longest established dedicated manufacturers, offer a comprehensive range of equine nutritional supplements.

The Equine Products UK Ltd range includes nutritional support products for joints and soundness, hooves and skin, respiratory health, digestion and behaviour, support of the immune system, as well as broad spectrum vitamin and mineral supplements. All Equine Products UK Ltd supplements comply with the guidelines laid down by the Veterinary Medicines Directorate, for complementary feeds, as well as with the guidelines set out by both the Jockey Club and FEI regarding prohibited substances. The company uses the latest research from across Europe, America and Australia to formulate, with a panel of nutritional experts, supplements that are at the forefront of their field

Fully licensed manufacturing facilities in Newcastle Upon Tyne supply top quality product on a world-wide basis, with main markets being the UK, Europe, North America and the Middle East.

It is now widely accepted that modern agricultural methods produce basic feeds that frequently lack all the necessary nutrients essential to the health and well being of horses and ponies.

Horses being fed the Equine Products range of supplements have won in various different equine disciplines throughout the world. Horses including thoroughbreds, trotters, endurance horses, eventers, show jumpers and breeding horses have benefited from utilising a correctly balanced diet.

Throughout the world the professionals, within the industry, have one thing in common “they only use products they can trust.” Rest assured that every one of Equine Products supplements have been tried and tested to ensure that you are getting the quality that only over 30 years of industry experience can provide.

# 4 Sponsorship Portfolio

**Caroline Powell needs little introduction to eventing aficionados, enjoying a tremendous season in 2010, which included winning Burghley 4\*CCI with the athletic grey Lenamore and a team bronze medal at the World Equestrian Games in Kentucky with Mac Macdonald as a member of the New Zealand team.**

**Caroline, who came to the UK on holiday from her native New Zealand 19 years ago “and never went home”, has run her own yard in the Scottish Borders for 15 years. She has an excellent track record in the sport, which is a reflection of her well respected ‘hands on’ approach to management.**

**She starts the 2011 season with a string of “really lovely horses with the experience to compete successfully at the higher levels of the sport”. They include Lenamore, being aimed at Badminton and Burghley, Boston Two Tip making his Badminton debut, Mac Macdonald and Mrs Tilly who travel to Luhmuhlen, along with some talented younger horses.**

**“I need to be sure that each horse receives the correct nutritional support to maximise performance and working closely with Equine Products UK is a very positive step for me because I'm really enthusiastic about the product range.”**

**“In particular, especially given the amount of travelling we do on top of training and competing, I feed Transvite Maintenance to help maintain condition and reduce stress by ensuring stable and healthy digestive function. I also ensure each horse receives balanced nutritional support to maximise performance by feeding Selenavite E.”**

Alex Hua-Tian jumped onto the international eventing stage in 2008 and continues to achieve results at top level, finishing just outside of the top 20 with the mare Magenta at his first Badminton 4\*CCI last season. Magenta also won an advanced class at Aston le Walls and ESB Irish Fiddle, whom Alex says, “grew in both

experience at confidence during 2010”, was well placed at Blenheim 3\*CCI.

This season Alex starts his Olympic qualification campaign with both Magenta and ESB Irish Fiddle and his 2008 Olympic

horse FBW Chico is returning to fitness after injury. He also has some exciting young horses being aimed at the Olympic Test event in Greenwich Park and the Young Horse Championships in Le Lion d'Angers.

Only too aware of the importance of correct nutrition in achieving peak fitness and performance, Alex remains totally confident in products from the Equine Products UK range and says, “We routinely use a number of products, including Selenavite E and FlexiVite HA that I feed to all of my horses. The product specifications are impressive and along with the nutritional advice available, give me a lot of confidence.”

“I feel that FlexiVite HA is important for suppleness, which is a pre-requisite of success in all the phases and Selenavite E ensures that the diet contains all the nutrients that are essential for both ongoing good health and wellbeing.”

# 6 Sponsorship Portfolio

Ruth Edge commands respect as a producer and rider of both event and dressage horses. The 2010 season,

her third on the World Class Performance Squad, included winning the British Intermediate Championship with Applejax, riding Carnaval Prince into second place at Blenheim and taking eighth at Pau with Two Thyme.

In the dressage arena, Ruth competes her own Shadowfax at small tour and he remains on the British Dressage Pathway. She also has Zero and Charlesfield Dante, who shared the British Dressage Winter Elementary Championship on identical marks and both now compete successfully at advanced medium.

Ruth's 3DE plans include taking Two Thyme to Badminton, both Carnaval Prince and Rogersdale to Bramham and Applejax to Tattersalls. She says, "It's a crucial year for 2012 preparation and I hope to have several horse achieving qualification for the London Olympics."

Having worked with Equine Products UK now for three seasons, Ruth remains delighted with the support she receives, which she describes as a perfect fit with her detailed attention to nutritional management.

"I use a number of products routinely for all the horses, but two in particular are very important. FlexiVite HA supports the horses' joints at every level and I think it's especially helpful for long term soundness in older horses. It's also vital that electrolyte balance and hydration levels are correct and I use Restore-Lyte, as it also contains a carbohydrate energy source that assists performance and recovery."

**Simon Buckley is carving a successful career in the very competitive world of international show jumping and producing a number of very highly regarded young stallions, some of which are now reaching grade A.**

**HFS Valentino secured second place in the incredibly competitive 98-starter 2010 5yo Championship at the SCOPE Festival together with numerous other successes. Both Jericho and the mare Ciella recorded high profile top three placings.**

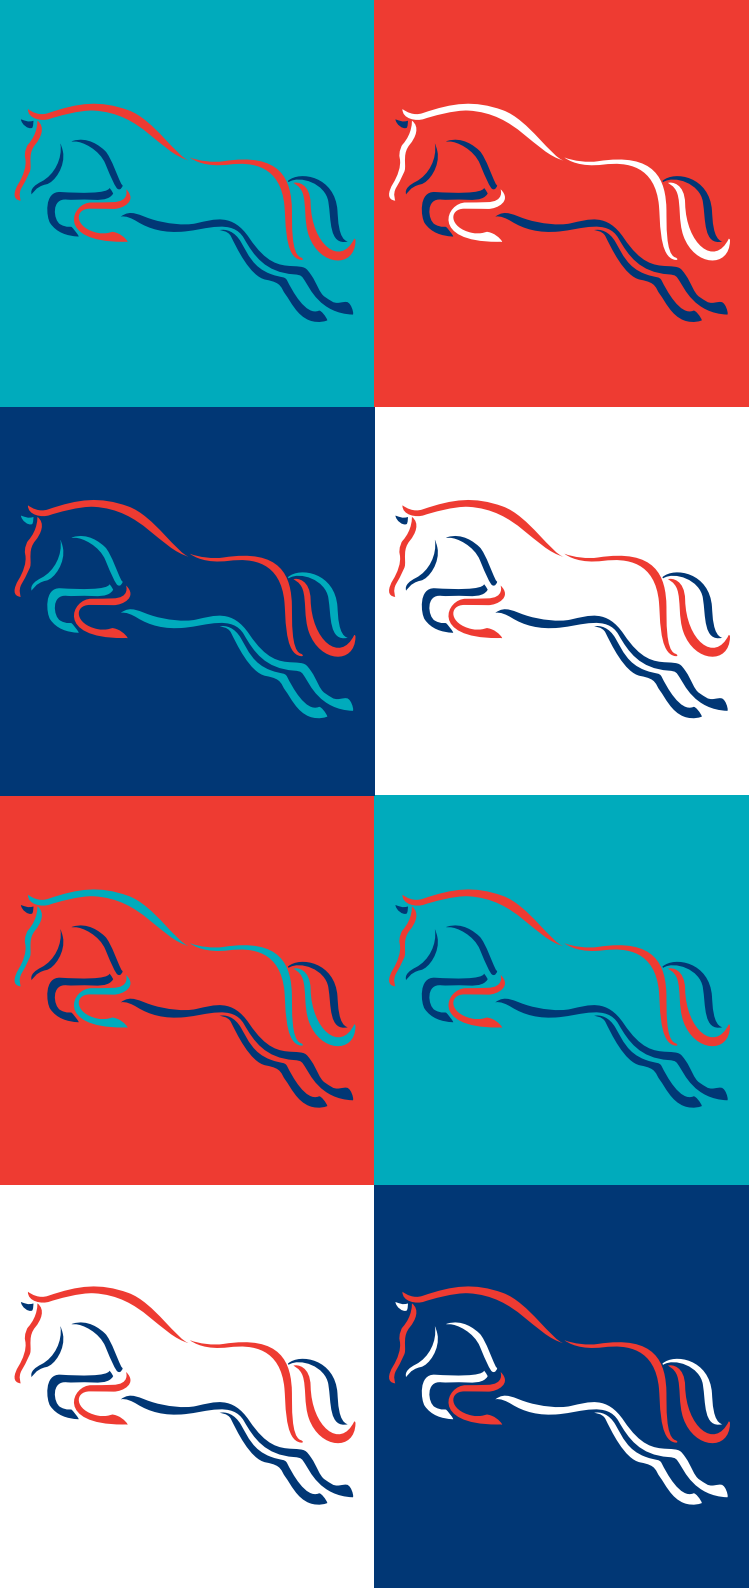

**This season Simon intends to progress the careers of all the horses and to qualify**

**for the most prestigious of the young horse championships – the National Foxhunter. In addition to developing the young horses, he is planning international competitions for the experienced horses and says, “The horses I’ve got now are as good as I’ve ever had and I am excited about 2011.”**

**When it comes to supplements, Simon says, “I use what I need for individual horses and have always been very pleased with both the products and nutritional advice from Equine Products UK. Correct management is vital and I regularly use a number of products to ensure both health and performance.”**

**“All of the horses are on Transvite Maintenance when they’re travelling and competing and Flexivite HA is fed to every horse in work, as it’s essential to support joint function in show jumpers. We use Restore-Lyte all the time and when the season gets very intense, HaemaviteB Plus is an ideal blood supplement if a horse feels less enthusiastic after a series of shows.”**

# 10 Selenavite E Powder

**ALL-ROUND  
FEED  
SUPPLEMENT**

**Recognised as a comprehensive and effective all-round quality horse and pony feed supplement.**

Selenavite E is a balanced supplement which provides some 22 micronutrients including trace elements, vitamins and amino acids.

There is no better way to assist the ongoing health, wellbeing and good condition of your horse or pony.

- Contains essential vitamins
- Also contains supplementary amounts of trace elements and amino acids
- A balanced feed supplement for everyday use

## **DAILY FEEDING INSTRUCTIONS** Available in 500g, 1.5kg, 4kg and 10kg tubs.

Adult horses (working)	50g	Vitamin B2	60mg	Iron	200mg
(resting)	25g	Nicotinic acid	100mg	Copper	50mg
Ponies (working)	25g	Pantothenic acid	50mg	Cobalt	1mg

# Selenavite E Liquid 11

**HIGH  
PERFORMANCE  
SUPPLEMENT**

**Selenavite E Liquid is a comprehensive horse and pony feed supplement, specially formulated in a palatable molasses base.**

Selenavite E Liquid is a balanced supplement providing essential vitamins, minerals, trace elements and amino acids.

It is designed to deliver an effective daily supplementation in a convenient liquid formulation, ensuring maximum performance from your horse or pony.

- **Liquid formulation for rapid absorption**
- **A balanced feed supplement for everyday use**
- **Provides essential micronutrients for maximum performance**
- **Palatable molasses base**

## DAILY FEEDING INSTRUCTIONS

Available in 1ltr and 5ltr containers.

Adult horses (working)	60ml	Vitamin B1	1,500mg	Iodine	45mg
Adult horses (resting)	30ml	Vitamin B2	1,200mg	Zinc sulphate	2,600mg

# 12 Haemavite B Plus

HIGH  
IN FOLIC  
ACID

This highly palatable supplement is designed to assist in the maintenance of healthy blood levels and contains four key elements in an appetising syrup base.

It is routinely fed prior to races or competition to assist maximum levels of essential blood nutrients needed by horses and ponies when in hard work.

Additional amounts should be fed only on veterinary advice, and may be useful when recovering from viral anaemia.

- Contains Vitamins B6, B12, and Folic Acid; as well as Sodium Ferredate ( Sodium Iron Edetate) which is well absorbed in the gastro-intestinal tract.
- Encourages poor feeders
- Available in 50g sachets as an additional booster when required

## DAILY FEEDING INSTRUCTIONS

Available in 50g sachets, 1ltr and 5ltr containers.

## ALL-ROUND IRON TONIC

**A concentrated iron supplement specifically formulated to assist in the maintenance of the iron and energy status of your horse.**

When a horse or pony's performance becomes lacklustre, Iron Plus tonic may help restore the sparkle it needs.

Ideal for eventers, showjumpers and all competition horses. This quick-acting formulation also helps sustain peak performance over prolonged periods.

- Fast acting, general purpose iron tonic
- Use daily as an all-round tonic to help restore vitality
- Appetising flavour
- All round booster

# 14 Restore-Lyte

**IONISED  
BODY  
SALTS**

**The correct balance of ionised body salts (positive and negative) are vital to a horse or pony's wellbeing and the capability to perform at peak levels.**

Restore-Lyte is designed to assist with the rapid replacement of ion salts lost through sweating during exercise or very hot conditions and help with the maintenance of vital mineral reserves which can be lost by essential tissues.

Totally soluble in water, Restore-Lyte also contains a carbohydrate energy source to assist in obtaining maximum performance.

- **Helps maintain muscle integrity and energy supply**
- **Contains a non-glucose carbohydrate source**
- **Two vital products in one**
- **Available as a one shot syringe for before or after competition or hard work**

## DAILY FEEDING INSTRUCTIONS

Available in 1.5kg, 4kg and 10kg tubs and as a 1ltr and 5ltr liquid and in a 35g syringe.

# Equine Energiser 15

THE NO.1  
CARBOHYDRATE

Equine Products (UK) Ltd. pioneered the use of alternative carbohydrates instead of glucose to assist in the replacement of energy lost during hard exercise and to aid recovery after competition.

These carbohydrates, unlike the carbohydrate glucose, appear to re-enforce the energy stores of the muscle and liver more effectively.

Equine Energiser has helped produce results in all areas of equine competition.

- Assists in the promotion of stamina and peak performance
- Use before races or competition
- Suitable for endurance horses, team chasers, event horses, showjumpers, trotters, polo ponies, dressage horses, national hunt horses, point to pointers and race horses

## DAILY FEEDING INSTRUCTIONS

Available in 100g sachets and 2kg tubs.

Pre-competition	100g
Post-competition or after hard exercise	100g
Prolonged competition (At rest intervals up to 200g maximum per day)	25g

For endurance riding use before, during and after the event.

# 16 Copper-Triton

## NUTRITIONAL BREAKTHROUGH

**Copper-Triton is a vitamin mineral nutritional supplement containing essential vitamins including vitamins E, B6 and B12.**

Most importantly, it contains organically chelated sources of copper, manganese and zinc.

It is well-recognised that there is a need for a supplementary source of copper for horses and ponies aiming for high levels of performance.

- Multi-boost sachet - (300mg of copper per 50g sachet) as an extra copper boost when required
- Copper is an essential mineral for maximum performance
- Contains copper, manganese and zinc chelated to an organic molecule
- Aids performance and wellbeing

COMPLETING  
THE  
ANTI-OXIDANT  
NETWORK

**LyPic+ is a complementary feedstuff, packed in convenient daily dose sachets, which should be fed to horses for 3-4 days immediately prior to, and after a race, competition or strenuous exercise.**

LyPic+ contains B-Complex vitamins which are vital for conversion of feed into energy. It also contains Alpha Lipoic Acid a novel antioxidant and co-enzyme for energy production.

- Convenient daily dose sachet
- Provides vital B-Complex vitamins necessary for metabolic processes.
- Contains Alpha Lipoic Acid, a novel antioxidant.
- Feed pre and post race / competition

## DAILY FEEDING INSTRUCTIONS

Available in 6 x 40g sachets.

Horses: Feed one sachet daily mixed with feed for 3-4 days prior to and after a race, competition or strenuous exercise.

MAINTAINS A  
HEALTHY  
CIRCULATORY  
SYSTEM

**A simple to use nutritional supplement formulated to aid in maintenance of a healthy circulatory system.**

Haematrol K contains the important vitamins K and C. Vitamin K is essential for the formation of prothrombin, the blood clotting factor, while vitamin C is a powerful anti-oxidant which helps mop up free radicals in the lung capillaries.

- Contains a mixture of important vitamins K and C
- Iron enriched
- Helps to neutralise free radicals
- A tried and tested formula

ONE  
SHOT  
SYRINGE

**Free Flow is a completely new herbal product which has been formulated to aid micturition. The benefit to the horse is that the waste products and toxins may be removed from the animal's system more quickly.**

Free Flow contains a unique blend of natural herbal extracts combined in a palatable gel base.

Free Flow can be used in conjunction with Haematrol K which has been used in the field for a number of years and has been found to assist maintenance of a healthy circulatory system.

- **100% herbal product containing bearberry, marshmallow root, cornsilk and juniper**
- **One shot syringe**
- **Aids removal of excess fluids**

#### DAILY FEEDING INSTRUCTIONS

Available in 30g syringes.

Orally administer to the back of the mouth one 30g syringe 3-4 hours prior to competition.

**CONTAINS**  
Bearberry (UVA URSI)  
Marshmallow root  
Cornsilk  
Juniper

# 20 FlexiVite HA

THE  
ULTIMATE  
JOINT CARE  
PRODUCT

The latest innovation in joint care, FlexiVite HA is founded on new technological breakthroughs that combine the best of the 'tried and tested' ingredients with new chemistry.

FlexiVite is an oral feed supplement which provides a unique combination of biologically active substances known to maintain supple joints in horses.

Unique to Equine Products (UK) Ltd., FlexiVite enhances lubrication, shock absorption and elasticity.

- Combines biologically active substances known to maintain supple joints
- Contains Hyaluronic Acid which maintains viscosity of the synovial fluid
- Founded on new technological breakthroughs

## DAILY FEEDING INSTRUCTIONS

Available in 1ltr and 2.5ltr containers.

60ml per day for the first 7 consecutive days, 30ml per day thereafter

HELPS  
RELIEVE LACTIC  
ACID BUILD UP

**A new scientifically formulated supplement to help relieve the effects of lactic acid build up in race horses, eventers, showjumpers, trotters and horses competing in endurance events.**

Accumulation of lactic acid in the blood and muscles can occur in horses that are in rigorous training, or those fed a high concentrate ration. No Ties is an acid base balancer, which will assist in the management of susceptible animals by maintaining the horses buffer system and easing muscle fatigue.

- **Helps maintain the horses buffer system and ease muscle fatigue**
- **New formulation**
- **Ideal for race horses, eventers and showjumpers**

#### DAILY FEEDING INSTRUCTIONS

Add 80ml to the evening feed.  
An additional 30ml should be fed post-competition in the drinking water.  
The product may be poured onto the feed or administered directly into the horse's mouth.

Available in 1ltr and 2.5ltr containers.

**CONTAINS**  
Trisodium citrate  
Citric acid  
Carbohydrates

# 22 Premier E

**HIGH  
PERFORMANCE  
SUPPLEMENT**

**Premier E is a concentrated vitamin E supplement for horses and ponies needing the highest levels of nutritional input.**

Premier E is a powerful anti-oxidant formula which helps mop up free radicals in the muscle tissue.

Premier E also helps build healthy muscles and aids fertility.

- **High vitamin E content for natural peak performance**
- **Four key ingredients in a glucose base**
- **Assists in the maintenance of fertility in brood mares and stallions**
- **Helps to maintain healthy muscle tissue**

# 24 Hepatrition

## NUTRIENTS FOR LIVER FUNCTION

**Hepatrition is a complementary feedstuff which should be fed to horses to provide key feed ingredients required for normal liver function.**

Hepatrition contains a complex suite of amino acids, antioxidants and vitamins including Taurine, N-Acetyl Cystine, Milk Thistle, L-Arginine and Alpha Lipoic Acid.

- Convenient 20 day course
- Aids performance and wellbeing
- No withholding period
- Additional vital B-Complex vitamins necessary for metabolic processes

### DAILY FEEDING INSTRUCTIONS

# Optima BCAA 25

PROMOTES  
MUSCULAR  
INTEGRITY

**Optima BCAA is a unique combination of the branch chain amino acids L-Valine, L-Leucine and L-Isoleucine as well as the conditionally essential amino acid L-Glutamine.**

Branch Chain Amino Acids constitute about one third of a horse's muscle mass. They are essential to maintaining the integrity of the musculature during periods of intensive exercise and competition. Supplementation with Optima BCAA can assist in reducing incidence of induced muscle damage.

- Support muscle growth
- Improve immune function
- Help Reduce fatigue
- Enhance muscle recovery

## DAILY FEEDING INSTRUCTIONS

Available in 500g tubs

For routine use feed 12.5 gm twice daily

For competition use feed 25 gm twice daily for 4 days prior to competition, day of and day after competition.

One heaped scoop (included) = approx 12.5 gm

### Analysis per 12.5 gm

L-Leucine	5000mg
L-Valine	4200mg
L-Isoleucine	1800mg
L-Glutamine	380mg

# 26 Cal-Phos

## CALCIUM/ PHOSPHATE BALANCER

Calcium and phosphorous are two of the most important macro-minerals in terms of quantity required by horses, but it is the ratio of these elements which is crucial.

This is particularly important where horses are fed a diet with high grain intake as grains can have a ratio of phosphorous to calcium as high as 6 to 1. Calcium is essential for development of strong bones.

Regular feeding of Cal-Phos can assist in the maintenance of a balanced ratio of 2 calcium to 1 of phosphorous in the diet as a whole and can help to supply essential salt.

- Helps to maintain calcium/ phosphorous balance
- Assists in supplying essential salts
- Ideal for foals and yearlings
- Ideal for mares in foal and lactating mares

### DAILY FEEDING INSTRUCTIONS

Horses	100g per day
Foals and ponies	50g per day

Available in 4kg, 10kg and 20kg tubs.

# Calavite 27

THE  
BONE  
BUILDER

**Calcium is the key to strong and healthy bones. It is also essential for the proper function of the nervous system.**

Calavite was developed to assist in the maintenance of healthy levels of calcium, by also including in the formulation a carefully calculated proportion of vitamins D3 and A which aid absorption and utilisation of calcium. An ideal supplement for foals, young stock and lactating mares.

- **Assists in establishing healthy bones in foals and young stock**
- **Contains a balanced proportion of vitamins D3 and A**

## DAILY FEEDING INSTRUCTIONS

# 28 TransVite

COMBATS  
STRESS  
THE  
NATURAL  
WAY

**Beneficial and harmful bacteria exist in a fine balance in the intestines of every animal. This balance can be upset at times of stress.**

TransVite helps to promote and maintain a healthy digestive system enabling all animals, prone to stress, maintain condition and energy levels.

It also helps to give young stock the best possible start in life by helping to establish healthy levels of beneficial gut bacteria.

- Assists in establishing beneficial digestion following antibiotic treatment
- Ideal when used before competition, travel, training and/or diet change
- Combats stress the natural way
- Beneficial to young stock when used after birth and during weaning

## DAILY FEEDING INSTRUCTIONS

Available in 1.5kg tubs & 30g concentrated paste.

**POWDER**  
5g per 100 kilo body weight

AIDS  
DIGESTIVE  
FUNCTION

**TransVite Maintenance is a feed supplement for daily use containing both prebiotics and natural probiotics.**

The addition of probiotics to an animals daily diet will maintain digestive efficiency while colonising the gut wall with beneficial bacteria, thus inhibiting harmful pathogens by competitive exclusion.

The prebiotics utilised in TransVite Maintenance, fructo-oligosaccharides, provide a food source that only beneficial species of bacteria can utilise.

- Helps promote and maintain a healthy digestive system
- A daily source of beneficial bacteria
- Provides a food source for naturally occurring probiotics already present in the gut.
- Aids in competitive exclusion of pathogenic bacteria

## DAILY FEEDING INSTRUCTIONS

# 30 Sand Shifter

AIDS  
DIGESTION

**Sand Shifter contains  
psyllium husk powder, a  
revolutionary bulk forming natural fibre  
derived from psyllium seed.**

Once in the horse's digestive tract, psyllium forms a fibrous gel which adheres to the sand particles preventing them from staying in the gut and causing potential blockages. Its bulk forming capacity encourages movement by peristalsis, aiding the removal of blockages from the horse's digestive tract.

Aniseed flavouring normally irresistible to horses has been added to increase palatability.

- Contains kaolin to aid the whole digestive process
- Specially formulated for horses or ponies grazing sandy loams or short grass
- Highly palatable, assists in easing the movement of sand particles through the gut.
- Unique aniseed flavouring irresistible to horses

## DAILY FEEDING INSTRUCTIONS

Available in 700g and 4kg tubs.

For a 500kg horse feed 150g of powder for 4-5 days. Once the sand particles have been eased through the gut the horse may require feeding for a further 2-3 weeks to rid the colon of sand.

For horses grazing sandy loams or short cropped grass feed 50g twice daily for seven consecutive days, once every 3-4 weeks or as directed by your veterinary surgeon.

**ANALYSIS per kilo**  
Psyllium husk Powder **600g**  
Kaolin **350g**  
Aniseed flavouring **50g**

# Hoof Health Spray 31

HELPS  
PREVENT  
HOOF, SOLE  
AND FROG  
AILMENTS

**Farriers Friend Hoof Health Spray is a new formulation designed to help prevent sole frog and hoof ailments.**

For maximum effect it should be applied twice a day after hooves have been picked out and cleaned. Just two sprays per affected area is all that is required.

The solution helps maintain the correct pH levels in the hoof and so reduce pathogenic challenge from hoof bacteria and viruses.

- **Unique formulation provides a barrier which keeps hoofs clean and dry**
- **Contains essential oils, zinc and copper**
- **Totally natural product**
- **Economical and easy to use - approximately 480 applications per pack**

## APPLICATION

Available in 600ml bottles.

As and when required.

**CONTAINS**  
Organic acids  
Essential oils  
Zinc  
Copper

# 32 Relax

NATURAL  
COOLANT  
CLAY

**A coolant clay for soothing inflammation and soreness in tendons, fetlocks and suspensories.**

Relax is an ideal coolant for thinly spreading over the legs, following exercise or competition, and is easily washed off with cold water.

An entirely natural aqueous clay in a ready to use form, Relax provides a practical solution to constant problems.

- **Contains witch hazel for improved cooling**
- **Assists in the relief of swelling, bruising and soreness**
- **Ideal for use following exercise or competition**
- **A natural 24-hour coolant clay**

## APPLICATION

Spread evenly over affected area by hand. Leave for 24 hours.

Do not apply to open wounds.

Available in 5kg and 10kg tubs.

## CONTAINS

Witch hazel  
Eucalyptus  
Aloe Vera  
Glycerine

# Leg, Shin & Muscle Wrap Lotion

33

HELPS TO  
SOOTHE  
SORE SHINS  
AND  
BRUISES

**A natural preparation made from arnica and witch hazel, two highly effective plant extracts mixed in a liniment base.**

The natural ingredients assist in soothing sore shins, bruises, contusions and injuries caused by blows or impact on hard ground.

- Assists in soothing sore shins, bruising and contusions
- Contains arnica and witch hazel
- Assists in recuperation from sprains and injuries due to blows of high impact

## APPLICATION

Available in 500ml and 2ltr containers.

Apply to affected area at least twice daily

**10-15mls  
per dressing**

## CONTAINS

Arnica  
Witch hazel

Do not apply to open wounds.

# 34 Bio-Triton

AIDS  
IN THE  
MAINTENANCE  
OF HEALTHY  
HOOVES

Bio-Triton is designed to promote the growth of healthy hooves by supplying correct levels of essential nutrients in the daily diet.

Bio-Triton contains high levels of biotin, a deficiency of which is a major cause of hoof deterioration.

It also contains essential amino acids which are vital to ensure the structural integrity of the hoof horn.

- Contains the two crucial amino acids, lysine and methionine
- Also contains biotin and zinc methionine
- Designed to aid healthy hooves
- Encourages new hoof growth

## DAILY FEEDING INSTRUCTIONS

Available in 500g, 1.5kg and 4kg tubs.

Horses and larger ponies  
Smaller ponies, foals and donkeys  
Continue to use until hoof growth is satisfactory.

# Quality control every step of the way

Correct formulation is vital to the effectiveness of any supplement because every nutrient depends on others to work properly.

The more precisely the correct amounts are calculated, the more effective they are and the less wastage occurs.

These rigid principles apply in the selection of ingredients for this range of products.

Formulations are under constant review as are sources and quality of raw materials. The manufacturing operation is constantly monitored to ensure that Equine Products (UK) Ltd. always offers unbeatable quality and value for money.
